

Aniwell products are distributed throughout NZ by Phoenix Pharm Distributors Ltd. Available at your local Veterinarian or Rural Stockists A clear, protective antibacterial sunblock cream that acts as a skin. Ideal for horses in equestrian events. PLE PIGS_SHEPS_DIGS_CARE

What is FiltaClear®?

FiltaClear® acts as a total sun block, is an antibacterial protective skin cover and can rub in to provide a translucent or <u>near-clear</u> film for use on horses, cats and dogs. The fine film minimises rub off on furniture or carpet.

FiltaClear[®] contains BitrexTM an extremely bitter compound that will deter or stop licking of the area it has been applied to.

FiltaClear® is specifically designed for use on large and small animals with sensitive skins.

FiltaClear® is suitable for show animals such as dressage, show jumping or showing when external marks may be a distraction or are not permitted.

FiltaClear® can replace FiltaBac®Cream in those circumstances, continuing to provide sun protection with low to no visual impact.

How to use FiltaClear®:

- Cover the area to be treated (sun protection) with a thin visible film. This can be gently massaged in to provide sun blocking action up to 8 hours.
- A thick layer of FiltaClear[®] may be used for longer sun blocking protection and as an antibacterial cover.
- Re-apply FiltaClear[®] to the area for 2-3 days without removing the original cover.
- After this period, gently remove residual cream and dirt from the area by using warm water and a mild soap or a nonsoap cleanser.
- Pat or air-dry (do not rub) and re-cover with FiltaClear[®]. Hair will re-grow naturally on the area.

When to use FiltaClear[®]:

- Sun block and wind protection
- Clipper rash: anti licking agent deters causing more irritation
- Albino or white cats and dogs protection on noses and ear margins, safe to use on sensitive skin areas
 - •Sunburn: from sun or heat lamp exposure
 - •Over veterinary procedures, to cover,
 - protect and prevent licking.
 - If symptoms persist seek veterinary advice
 - Do not use around the mouth, lips or on teats of lactating animals.
